Profile

I have experience across business, academia, and the public sector, having conducted scientific research, data analyses, and statistical modelling. I taught at the university level and led cross-functional teams. I thrive on tackling complex challenges by looking for functional and lasting solutions. My passion lies in uncovering valuable insights from data and my interest is leadership and team development. I am an instructor at [Prázdňinovka](#) – Czech Experiential Learning Centre. I believe in accountability, authenticity, and attentiveness. Commit to one thing at a time, be curious, speak openly, embrace vulnerability and take responsibility for your actions. I am fluent in Czech and English and able to communicate in French. Beyond work, I read and stay active through cycling, skiing, mountaineering, and swing dancing.
